the book presents the current state and good practices of national forest inventories in monitoring wood resources and demonstrates pathways for harmonisation and improved common reporting beyond a general overview over availability and use of wood resources in different countries it provides a unique collection of original contributions from national forest inventory experts with in depth descriptions of current nfi methods in assessing wood availability and wood use in european countries and selected countries from america and asia the main topics are national definitions and improvements in common reporting of forests available for wood supply stem quality and assortments estimation of change including growth and drain and tree resources outside forest land the book is a must have for everyone who is contributing to national forest inventories either methodologically or operatively for people who want or need to understand national forest inventory provided data and information on the availability of wood resources by providing profound

knowledge it is a valuable basis for scientists involved in scenario modelling and analysing effects of climate change as well as individuals in private organisations and public administrations promoting the sustainable use of natural resources and the potential of green economy

redd represents countries efforts to reduce emissions from deforestation and forest degradation and foster conservation the sustainable management of forests and the enhancement of forest carbon stocks the basic idea is that more carbon can be sequestrated and stocked in tropical forests by improving their conservation management and sustainable use thus contributing to mitigating climate change the developing countries and relevant stakeholders concerned will be financially compensated for these endeavors either through public funds or private carbon markets given this context this book will address the need to assess the political and socio economic dimensions of the performance of redd which is relevant to policy makers practitioners and scholars this implies taking into account the various levels from global to local and dimensions e g results based payments mrv co benefits and community engagement as well as divergent disciplinary connotations of performance we therefore pose the following question what does performance mean in answering this question we provide examples of assessments of performance we present 9 cases of how redd has performed on local national and international scales and reflect on the representativeness of these examples and their limitations when looking at the current range of redd initiatives along with what is missing in terms of evaluating the performance of redd we conclude by establishing why performance assessment remains so relevant today

national forest inventories nfis are one of the main sources of forest information this book describes the importance and history of nfis in latin america and the caribbean a region that is particularly relevant due to the extension and biodiversity of its forests methodologies for data collection and measurement of the most relevant indicators in 21 countries are addressed in addition similarities and differences in ifn designs challenges and opportunities and prospects for the future are examined this analysis demonstrates that the information generated by the countries is diverse and must be harmonized to meet the commitments and opportunities for sustainable forest management in the 21st century this publication represents a milestone in the beginning of the harmonization process towards data transparency within the forestry sector in latin america and the caribbean and constitutes the first collaborative effort of a network of nfi experts and collaborators in the region
