war and change in world politics introduces the reader to an important new theory of international political change arguing that the fundamental nature of international relations has not changed over the millennia professor gilpin uses history sociology and economic theory to identify the forces causing change in the world order the discussion focuses on the differential growth of power in the international system and the result of this unevenness a shift in the balance of power economic or military weakens the foundations of the existing system because those gaining power see the increasing benefits and the decreasing cost of changing the system the result maintains gilpin is that actors seek to alter the system through territorial political or economic expansion until the marginal costs of continuing change are greater than the marginal benefits when states develop the power to change the system according to their interests they will strive to do so either by increasing economic efficiency and maximizing mutual gain or by redistributing wealth and power in their own favour

in this engaging book eminent scholar george liska demonstrates the intricate and complex relationship between world

politics and world history and he proposes a systematic but fundamentally new method of thinking about world politics building on ideas developed in his earlier works particularly the legacy of the cold war liska expands his geopolitical approach into a geohistorical one rejecting the idea that periods and events should be viewed as static fixed structures liska s analysis reveals the cyclical nature of world history and develops a new kind of realism that encompasses the problems of expansion and evolution this innovative book by a world renowned political thinker has far reaching implications that will be valuable to all students and scholars of international relations world history and the philosophy of history

there have been significant political eras which have shaped not only the structure of world politics but the way in which it has been studied the geopolitical and ideological contours of the cold war period for example had an impact on almost every aspect of world politics and the study of international relations for around 45 years this book argues that just as the collapse of the soviet union in the period following the fall of the berlin wall signalled the end of strategic polarization it also marked the apparent end of a particular form of polarized debate around political social and economic ideas the various new directions taken by scholars of international relations in the post cold war era constitute a large part of a new agenda for the discipline this collection reflects the variety of issues and approaches that have become part and parcel of this agenda over the past ten years issues tackled in this volume include the power of culture and ideology the concept of globalisation inequality human rights and security as well as reflections on new forms of polarization in the post cold war world each contributor addresses the nature of changes and continuities in world politics considers how the discipline of international relations itself has changed and reflects on possible directions for the twenty first century this book will be of great interest to scholars of international relations global politics economics and related disciplines
